Description

✓ We are seeking a passionate and skilled AI/ML Developer with hands-on experience in Large Language Models (LLMs), Python, and prompt engineering. You will be responsible for designing, developing, and deploying AI-powered solutions using state-of-the-art machine learning models with a focus on language understanding and generation. This role requires a blend of technical depth, logical problem-solving, and strong communication skills to translate complex business requirements into scalable AI solutions.

Missions

Responsibilities:

- ✓ Design, fine-tune, and deploy LLM-based solutions for real-world business problems.
- ✓ Develop and optimize prompts to guide model behavior for various use cases.
- ✓ Write clean, efficient, and scalable Python code for model development and integration.
- ✓ Analyze model performance and troubleshoot issues with data quality, token usage and output alignment.
- ✓ Collaborate with product owners, data scientists, and engineers to identify and prioritize AI use cases.
- ✓ Stay current with the latest advancements in AI/ML, especially in the generative AI space.
- ✓ Document model behavior, prompt iterations, and implementation decisions clearly for both technical and non-technical stakeholders.
- ✓ Ensure ethical and responsible AI development practices.

Profil

Requirements:

- ✓ Bachelor's or Master's degree in Computer Science, Engineering, Data Science, or a related field.
- ✓ 2-5 years of proven experience working with LLMs (e.g., GPT, LLaMA, Claude, Mistral)

Profil

Alertes

- ✓ Strong programming skills in Python, with experience using relevant libraries (e.g., Transformers, LangChain, OpenAI API, Hugging Face)
- ✓ Practical experience in prompt engineering, including prompt chaining, prompt tuning, and system message crafting.
- ✓ Solid foundation in machine learning concepts and natural language processing.
- ✓ Strong logical thinking and problem-solving skills with an ability to break down complex problems into structured solutions.
- ✓ Excellent communication skills both written and verbal to convey technical concepts to diverse stakeholders.

Preferred Qualifications :

- ✓ Experience with model fine-tuning or reinforcement learning from human feedback (RLHF).
- ✓ Familiarity with vector databases and retrieval-augmented generation (RAG) techniques.
- ✓ Exposure to cloud platforms like AWS, Azure, or GCP.
- ✓ Experience with ML Ops, containerization (Docker), and model deployment pipelines.
- ✓ Contributions to open-source AI/ML projects or publications in relevant areas
- ✓ **Fluency in English is a must**
- ✓ **MUST submit a Resume in English**
